

# Circuit Reliability Review Lindsay

January 2017

## Providing Safe, Reliable, and Affordable Power

Southern California Edison is modernizing the power grid to meet the changing needs and expectations of our customers and to help California achieve its clean energy goals.

We are investing more than \$12 billion into our power grid between 2015 – 2017 with the goal of increasing power reliability through significant upgrades. These investments include:

- Updating thousands of transmission and distribution poles
- Replacing hundreds of miles of underground cables
- Replacing hundreds of underground structures such as vaults and manholes
- Upgrading critical distribution equipment; capacitor banks, switches, and circuit breakers
- Building new distribution circuits to serve electrical demands in our communities
- Inspecting and replacing overhead conductor and equipment to improve public safety

Our investments in local communities will help ensure that customers receive safe, reliable, and affordable electricity now and in the future.

## **Understanding Your Reliability Report**

As your electric utility, we want you to always have power when you need it. To get there, we constantly track and monitor electric outages across our service territory, and we measure our "system reliability" from this data.

The two metrics we rely on are common in the electric utility industry: the System Average Interruption Duration Index (SAIDI) and the System Average Interruption Frequency Index (SAIFI). Both are described in more detail on the next page.

Replacing and upgrading our infrastructure will help SCE maintain or improve SAIDI and SAIFI measurements.

This report provides historical reliability data for the circuits that serve your jurisdiction and our proposed infrastructure upgrades for the current year.

To view other reliability reports, visit <a href="sce.com">sce.com</a>>Outage Center>Maintaining Reliable Service

## Reliability Metrics

**MOMENTARY OUTAGES:** 

**OUTAGES LASTING 5 MINUTES OR LESS** 

#### MAIFI:

 The number of times the average customer is interrupted by Momentary outages each year.

#### **SUSTAINED OUTAGES:**

**OUTAGES LASTING LONGER THAN 5 MINUTES** 

#### SAIFI:

 The number of times the average customer is interrupted by Sustained outages each year.

#### SAIDI:

 The cumulative amount of time the average customer is interrupted by Sustained outages each year.

## Cities and Communities in the San Joaquin Region

Armona Springville

Delano Strathmore

Ducor Terra Bella

Earlimart Three Rivers

East Porterville Tipton

Exeter Tulare

Farmersville Visalia

Goshen Woodlake

Hanford Woodville

Ivanhoe

Lemon Cove

Lindsay

<sup>\*&</sup>quot;Exclusions" are days which utilities are allowed to remove from their metrics because the outages on those days were caused by a severe acts of nature.

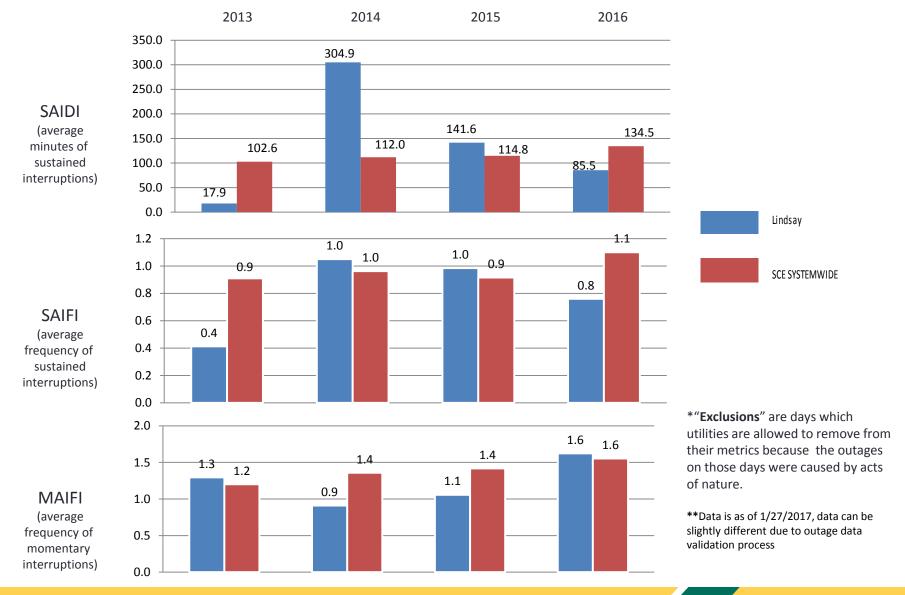

<sup>\*\*</sup>In the columns showing "Rank," lower numbers indicate poorer performance.

## Overview of Lindsay There are 8 circuits that serve Lindsay

Circuit Type	Sum of Customers	Circuit Type	Sum of Customers	Circuit Type	Sum of Customers	Circuit Type	Sum of Customers
BOOSTER(12KV)	1,029						
BURR(12KV)	1,212						
CAIRNS(12KV)	1,011						
FAIRLAWN(4.16KV)	259						
LEWIS(12KV)	500						
ROSEDALE(12KV)	748						
ROUND VALLEY(12KV)	853						
TOWT(4.16KV)	481						

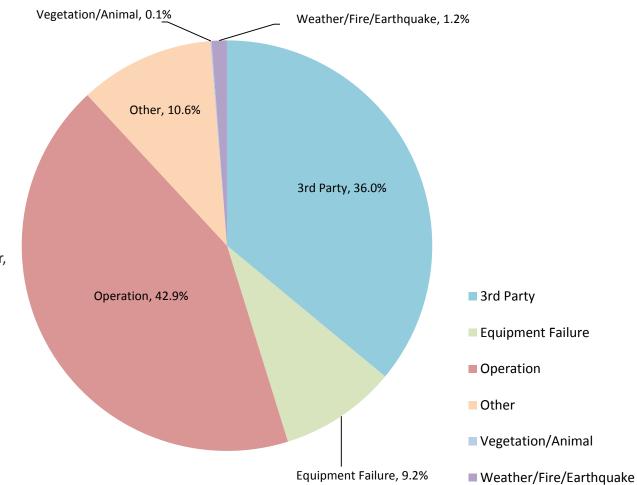

**Grand Total** 6,093

## Reliability History of Circuits Serving Lindsay (No Exclusions)

### Causes of Repair Outages in Lindsay Circuits 2016 YTD

#### **Contributions to SAIDI by Outage Cause**

■ Equipment Failure

e.g., in-service failure of transformer, switch, or conductors

#### ■Vegetation/Animal

e.g., tree branch, rodent, or bird causing a short circuit between conductors

#### Other

e.g., patrolled but no cause found

#### Operations

e.g., urgent maintenance w/o 3-day notice

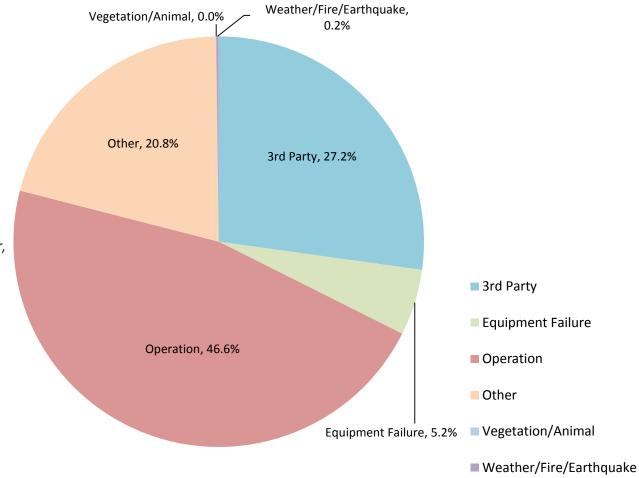

#### ■ 3rd Party

e.g., balloon, car hit pole, dig-in

**SAIDI** = the cumulative amount of time the average customer is interrupted by "sustained" outages each year.

## **Causes of Repair Outages in Lindsay Circuits 2016 YTD**

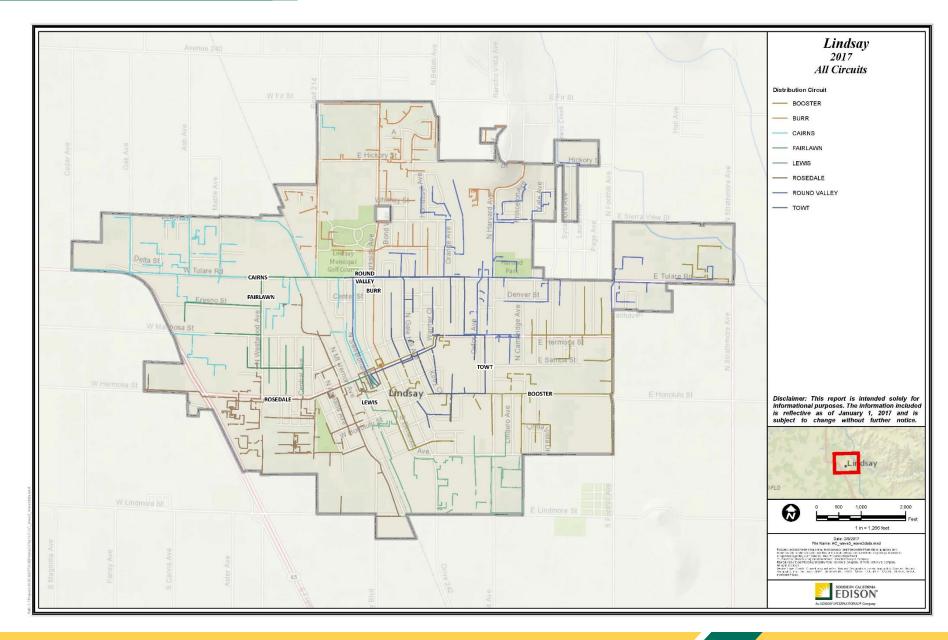

#### **Contributions to SAIFI by Outage Cause**

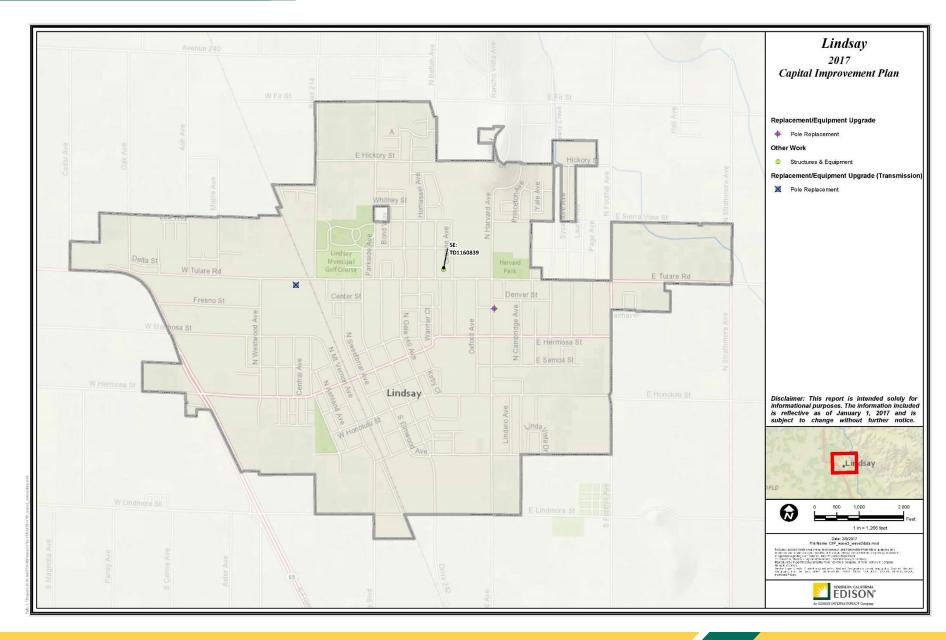

- Equipment Failure
   e.g., in-service failure of transformer,
   switch, or conductors
- Vegetation/Animal

   e.g., tree branch, rodent, or bird
   causing a short circuit between
   conductors
- Othere.g., patrolled but no cause found
- Operationse.g., urgent maintenance w/o 3-daynotice
- 3<sup>rd</sup> Party e.g., balloon, car hit pole, dig-in

**SAIFI** = the number of times the average customer is interrupted by "sustained" outages each year.

#### Notes:

No outages are excluded from the metrics.

#### Outage Causes:

Other: e.g., patrolled but no cause could be found

Operations: e.g., urgent maintenance w/o 3-day notice to customers

3<sup>rd</sup> Party: e.g., balloons, car hit pole, dig-in

Vegetation/Animal: e.g., tree branch, rodent, or bird causing short circuit across conductors

SAIDI (minutes) = the cumulative amount of time the average customer is interrupted by "sustained" (longer than 5 minutes) outages.

SAIFI (interruptions) = the number of times the average customer is interrupted by "sustained" outages.

MAIFI (interruptions) = the number of times the average customer is interrupted by "momentary" (lasting 5 minutes or less) outages.
